**IMPORTANT NOTE**

The *Access Yearbook* has been compiled by the manufacturers listed using KHL's own custom developed on-line live database software to ensure that the information contained in these pages is complete and accurate. KHL therefore accepts no responsibility for any errors or omissions that may have resulted. Should you have equipment that is not currently listed in the tables in the year book, please contact the editor, Euan Youdale, to gain access to the on-line updating system. This will ensure that your equipment is listed in the next edition, which will be compiled by the end of 2018. Manufacturers' data contained in this directory can be updated by individual manufacturers at any time. It is our hope that as new equipment is launched, manufacturers will add relevant data to the system, turning the database into a valuable on-line tool for equipment and machine selection. Please contact the editor for further information.

REACH NEW LEVELS  
OF PERFORMANCE

WITH FEATURES THAT  
UPHOLD PRODUCTIVITY

**MAKE IT EFFECTIVE. MAKE IT DURABLE. GIVE IT VALUE.** JLG designed its RS series of scissor lifts around three basic principles. The RS scissor lifts provide the reach, reliability and serviceability job sites demand, with a value that fits nearly any budget. Available in two models, the 6RS and the 10RS, JLG's RS scissor lifts prove that cost-effective design should never sacrifice performance.

BA28RT

### Advantage

#### 1.High-end Configuration

- ECU-controlled Euro-IV engine of Deutz, with strong power;
- Dana axle, with standard configuration of 4×4 drive & steering and differential lock; its power being boosted for over 20%; low failure rate;
- Bosch Rexroth power-driven system, efficient and energy-saving;
- Danfoss PVG hydraulic control system, with Can bus controller, reducing failure rate of its system by over 30%, and highly universalized.

#### 2.Precise Matching

- The engine output is electronically controlled, conserving about 20% fuel consumption;
- The whole series are subversively designed in structure. On the premise of ensuring excellent stability, comparing with same types from other brands, the total weight has been reduced by 15%-20%, which significantly reduces costs of use and transportation;

#### 3.Familial and modular design for the whole series, with major parts available universally;

#### 4.Rated loading capacity of platform up to 350kg, meeting requirements of various operating conditions;

#### 5.Equip with Secondary Guarding Protection system, with photoelectric sensor technology of global patent protection, to ensure safety of operators;

#### 6.Standard configuration of telescopic boom, with working range improved by over 10%;

#### 7.Product design fully comply with requirements of the latest EN280:2013+A1:2015 and ANSI/SIA A92 standard.

# In transition

**The access industry is in a state of transition with a number of acquisitions in the rental sector, combined with global growth.**

It has been an eventful year in the powered access sector, with an abundant supply of mergers, acquisitions and new players.

It demonstrates that the access industry is healthy and companies are looking to get involved.

It is the activity in the rental arena that is perhaps even more interesting than the manufacturing one. The acquisitions in this area over the last few months have changed the global access rental landscape, as well as making the top 10 of the Access50 look quite different.

The Access50 is *Access International's* listing of the world's biggest rental companies by fleet size and was published in the August-September 2017 issue of the magazine.

United Rentals, based in the US and the biggest rental company in the world, completed its buyout of NES Rentals in April, lifting its fleet size by around 20,000 to 123,000.

**A facility management company in Germany has rented platforms from truck mount specialist Kuhnle, based in Fellbach near Stuttgart, to protect a 15-store DIY chain from damage caused by pigeons. The deal was organised through PartnerLift, the national cooperation of more than 100 rental companies.**

In Europe, the Lavendon Group story was the talk of the industry for many weeks, as TVH Group and Loxam tussled to buy it. At one stage, new bids from both companies were being reported on a daily basis.

Loxam was the ultimate buyer of Lavendon, which had a similar fleet size to NES of just over 21,000. Loxam had also recently bought Spain-based major generalist Hune, which had around 5,100 units.

Then, in July, TVH Group announced it had acquired German access rental business Gardemann from Loxam, just a matter of months after acquiring it as part of the Lavendon group. It means TVH owns the two largest access rental businesses in Germany, adding Gardemann to Mateco, that it acquired in 2012.

Remaining in Europe AFI Group, an access rental company based in the UK rounded off a busy July with its acquisition of Kimberly Rentals Group. In 2016, AFI also increased its

**Niftylift hybrid boom lift working in a warehouse.**

business with the opening of new depots in the Middle East, notably with its buyout of Rapid Platforms in October 2016.

And the twists in the tale continued. H&E Equipment Services, based in the US, also announced in July it was on the acquisition trail, in its case to acquire Neff Corp, that was of course until August, when Neff said it had received a superior offer from an undisclosed bidder, which turned out to be... United Rentals.

## Fast moving

This activity is all on the back of a strong market for access platforms generally. The annual International Powered Access Federation's (IPAF) Powered Access Rental Market Report, compiled by global research intelligence company Ducker Worldwide, and released earlier this year, demonstrates this.

In recent years, the reports have tended to contain positive news leavened in most cases by some less positive, often with certain negative factors hampering one country's market or another. However, the 2017 report is

very positive across the board, with Europe and the US in particular exceeding expectations and experiencing steady growth.

The UK's mobile elevating work platform (MEWP) rental market outstripped the wider construction sector in terms of growth by three to one, showing little sign of any cooling on Brexit fears as other parts of the economy seem to have experienced in the second half of 2016 in particular.

In Asia too, market and fleet size growth were stellar in 2016, driven by Hong Kong, Japan and mainland China, and in the Middle East the market is also booming; the report for 2016 carries for the first time a focus on Dubai.

The only region that did not experience such favourable conditions was Latin America, where the MEWP rental market overall contracted slightly, mainly owing to the impact of a shrinking market in Brazil.

In Europe, all the countries under study found themselves with growing rental markets for the first time since the downturn in 2008. Among the stellar performers was Spain, where a resurgent construction sector helped the rental market grow by 7% over the year – a second consecutive year of growth at around that rate – while the next strongest growth was 5% in the German, Swedish and Finnish markets and Italy and the Netherlands on 4% growth.

The UK and France grew by 3%, which was the average growth for Europe as a whole over the year. Of the 10 countries under study in Europe, accounting for around 85% of the total current MEWP rental market, Norway and Denmark slightly underperformed in terms of growth on 1% and 2% respectively.

## ON THE RISE

It's been a dramatic year for *Access International's* Access50 listing of the world's largest access equipment rental companies, thanks to number of acquisitions and strong showing in the sector overall.

We have what could be described as a meteoric rise in the top five entries in this year's listing, measured by fleet size. When added together their total fleet size comes to an impressive 291,170, reflecting a 31% rise on the top five last year. There is one good reason for this – acquisition, as explained previously in this feature.

Apart from North America and Europe, Asia has also played a significant role in these increases. Asia, in general, it seems has almost unlimited potential for growth. Shanghai Horizon, China's biggest rental company has greatly expanded its fleet again over the last 12 months by more than 60% to just over 5000 units. There are also plenty more rental companies that are getting close and now exceeding the 1000 unit mark. Another is Fenghe Rental, based in China and new to the list this year with a fleet of 2350.

AJ Networks, based in South Korea, is in 15th position. It too has seen an incredible leap in fleet size of more than 100%, which the company has confirmed, saying it reflects its major growth plans in the region.

So, it has been a busy year for sure in the Access50, providing a real indication that there is now a global boom in the access equipment sector. Of course, major acquisitions bump up the figures at the top of the table and allow smaller companies to move up; that aside the industry is in a dynamic and exciting phase.

## access50: average fleet size by region

**A Skyjack SJ63AJ belonging to UK-based JMS is used to erect a wind sock at an airfield in the UK.**

## Global growth

A booming construction sector in the US was also credited with a stronger than expected year in which rental companies had previously priced in economic and legislative uncertainty and a change in presidency when giving their outlook forecasts in the closing months of 2015. In 2016 revenue growth was 8%, fleet size expanded by 6% and both utilisation and rental rates also grew by 1%.

The economy and in turn construction sector were comparatively strong in the US and this was the main driver for the positive indicators for the MEWP rental industry, which was once again characterised by mergers and acquisitions activity, including the deal for United Rentals to purchase NES Rentals, which at the time of takeover was valued as a \$352 million business. In Canada by contrast the MEWP rental market remained flat, negatively impacted by unfavourable oil prices and exchange rates.

BUILT SMALL YET

# mighty

Ideal for low-level interior applications, the compact and durable **Snorkel™ S3010E** mini scissor lift delivers maximum performance. Weighing just 495kg, this 3.0m self-propelled lift can be used on raised access floors, and is easy to manoeuvre thanks to intuitive 'point and go' joystick controls and a zero inside turning radius – perfect for working in confined spaces and narrow aisles. Efficient direct electric drive delivers long duty cycles between charges and the robust and reliable design results in low operating costs, and high utilisation.

**CURTISS -  
WRIGHT**

### Industrial Group

Arens Controls | PG Drives Technology  
Penny & Giles | Williams Controls

**Time tested,  
industry approved...**

Components and Systems for  
Mobile Elevating Work Platforms

**Curtiss-Wright Industrial Group** has established a leading position in the Aerial Work Platform market by being highly responsive to specific customer requirements and building long-term relationships with the leading OEMs.

Our diverse application knowledge base includes: **Vertical Mast Lifts | Indoor Scissor Lifts | Outdoor Rough-Terrain Scissor Lifts | Articulating Booms | Telescopic Booms**

Reach out to one of our Industrial Group experts to discuss your next project and learn more about Curtiss-Wright Industrial, our capabilities, and how we can help you deliver industry-leading solutions.

**Human-Machine Interface + Control**

**Motor Controllers**

**Joysticks**

**Sensors**

## 3 new COMPACT lifts

**OMMELIFT**

Quality since 1906

### 18.40 RXJ Crawler Lift

- ✓ 10.5 m outreach
- ✓ 1.99 m travelling height
- ✓ True hybrid

### 1700 EX Trailer Lift

- ✓ 9.1 m outreach
- ✓ Hydraulic propulsion
- ✓ Excellent manoeuvrability

### 1300 E Trailer Lift

- ✓ 9 m outreach
- ✓ Simple intuitive controls
- ✓ Rental ready

## HA26 RTJ PRO

BUILDING ON SUCCESS of HA16 range and HA20 range.

With the best working envelop and its exclusive 350kg load capacity, the 26m articulating boom is the machine you expected. Our latest innovations in terms of safety and return on investment are about to become your new standard:

- > NEW Haulotte ACTIV'Lighting System for easy and safe loading and unloading procedures
- > NEW generation of Haulotte ACTIV'Shield Bar to prevent crushing risks and protect operators
- > NEW Haulotte Stop Emission System that automatically stops and restarts the engine
- > NEW Haulotte ACTIV'Screen with on-board diagnostic system to support users in maintenance operations

# TEUPEN. JOB WELL DONE.

THE SOLUTION SPECIALIST  
FOR CHALLENGES IN HEIGHT ACCESS.

**TEUPEN**<sup>®</sup>  
...access redefined

Many jobsites that require height access pose seemingly unsolvable challenges to a tradesperson, building managers or cleaners - especially in modern architecture.

TEUPEN gives access to demanding locations on the interior or exterior - easy, safely and efficiently.

# All You Need is Life.

## *Reliable, clean, long lasting life.*

At work or play, Trojan meets your everyday needs with our **Reliant line of AGM batteries**. An all-encompassing portfolio of U.S. made, true deep-cycle, maintenance-free batteries designed to power what is important in your life.

Our Reliant batteries feature C-Max Technology™ which offers extraordinary performance, premium components and superior durability resulting in **longer battery life**.

At Trojan Battery we agree, **All You Need is Life.**

# HIGH QUALITY

## LARGE RANGE GREAT SERVICE

Thanks to a stock of over 94 000 references and a database with 1 155 000 known references, you'll find quality parts for your aerial work platforms such as joysticks, printed circuit boards, switches, chargers, non-marking wheels...

Our specialised sales advisors will gladly help you so that you receive the delivery the next day.

## New mast climbers, hoists & crane lifts

Alimak Hek's latest vertical access product models offer simplicity of operation and ease of installation at a highly competitive price.

- The new MC 650 & 450 are the latest generation in mast climbing work platforms, balancing performance, quality & efficiency in all types of façade work.
- The latest heavy-duty and medium-sized hoist models, the ALIMAK SCANDO 65/32 & 45/30, offer efficient vertical access on even the most challenging construction sites.
- Designed for installation on the majority of tower crane systems, the new ALIMAK TCL lift provides reliable and smooth access for crane operators.

Contact us for the best access solution!

Holland Lift presents its new smart models: HL-160 and HL-190. The concept is designed for tailored efficiency. A modular system with various options: 16 or 19m high, electric, diesel or hybrid; the base of the machine always remains the same. These scissor lifts have attractive exploitation costs and a high return on investment. And whatever configuration you choose, Holland Lift quality, safety and durability are as always part of the deal.

## The Powered Access Industry in **CHINA**

**NOW  
AVAILABLE**

### New Special Report

#### Highlights

- Unique, in-depth study written by industry experts
- First ever report into this thriving industry
- Sales and production of powered scissor and boom lifts
- Profiles of the key manufacturers, distributors and rental companies
- Five year sales forecasts

#### Grow Your Business

- Plan your sales and marketing strategy based on reliable data and high quality forecasts
- Identify opportunities for machine sales and component supply
- Gain fresh industry insights

# CONVERSION TABLES

These tables and conversion factors are provided to help readers with comparisons between Imperial (UK), US, and metric measurements.

SPEED									
Miles per hour (mph)	20	30	40	50	60	70	80	90	100
Kilometre/hour (km/h)	32	48	64	80	96	112	128	144	160

FUEL								
Gallons (UK)	1	2	4	6	8	10	12	14
Litres	4.55	9.09	18.18	27.27	36.37	45.46	54.54	63.64
Gallons (US)	1	2	4	6	8	10	12	14
Litres	3.78	7.54	15.14	22.71	30.28	37.85	45.45	53.00

WEIGHT							
Pounds	1	2	3	4	5	10	20
kilograms	0.454	0.907	1.361	1.814	2.268	4.536	9.072

TEMPERATURE												
°F	32	40	50	60	70	75	85	95	105	140	175	212
°C	0	5	10	15	20	25	30	35	40	60	80	100

METRIC CONVERSION		
<b>LENGTH</b>		
1 millimetre (mm)	=	0.0394 ins
1 metre (m) (1000 mm)	=	1.0936 yds
1 kilometre (km) (1000 m)	=	0.5214 mile
1 inch	=	25.4 mm
1 yard (36 inches)	=	0.9144 m
1 mile (1760 yards)	=	1.6093 km
<b>AREA</b>		
1 square metre (m <sup>2</sup> ) (10000 cm <sup>2</sup> )	=	1.1960 square yds
1 hectare (ha) (10000 m <sup>2</sup> )	=	2.4711 acres
1 square km (km <sup>2</sup> ) (100 hectares)	=	0.3851 square mile
1 square yard (9 square feet)	=	0.8361 m <sup>2</sup>
1 acre (4840 yards <sup>2</sup> )	=	4046.9 m <sup>2</sup>
<b>VOLUME</b>		
1 cubic metre (m <sup>3</sup> )	=	1.3080 cubic yards
1 litre (l)	=	0.2200 gallon
1 cubic yard (27 cubic feet)	=	0.7646 m <sup>3</sup>
1 pint (4 gills)	=	0.5683 litre
1 gallon (8 pints)	=	4.5401 litres
<b>HEAT</b>		
1 British Thermal Unit (BTU)	=	1055 joules
1 BTU/lb	=	2.326 kilojoules/kg
<b>WEIGHT</b>		
1 gramme (g) (1000 mg)	=	0.0353 oz
1 pound (lb) (16 ounces)	=	0.4536 kg
1 ton (2240 pounds)	=	1.0161 tonnes
1 US ton	=	2000 lb
1 metric tonne	=	2200 lb
1 hundred weight (cwt)	=	112 lb
<b>POWER</b>		
1 horsepower (hp)	=	746 watts (0.75 kW)
1 kilowatt (kW)	=	1.34 hp
<b>PRESSURE</b>		
1 bar (atmosphere)	=	14.2 psi
1 pound/inch <sup>2</sup> (psi)	=	6895 N/m <sup>2</sup>
1 (Newton/m <sup>2</sup> ) Nm <sup>2</sup>	=	1 pascal (Pa)
20 lb/in <sup>2</sup>	=	1.41 kg/cm <sup>2</sup>
<b>USA WET MEASURE EQUIVALENTS</b>		
1 US pint (16 fl oz) (0.8327 UK pt)	=	0.4732 litre
1 US gallon (0.8327 UK gal)	=	3.7853 litres
1 UK pint	=	0.473 litres
1 US barrel	=	5.62 ft <sup>3</sup> = 0.159 m <sup>3</sup>

Please do not use the conversion factors in important technical or safety calculations as they are offered as a guide to conversion and not as a precise listing.

The key figures printed in the centre column, can be read as either metric or imperial, example: 1 metre = 1.094 yards or 1 yard = 0.914 metres

Layher 

Ideas. Solutions. Possibilities.

# Success stories

**Darius Postweiler**, Junior Manager at QuadreX Geruestbau GmbH, also relies on the partnership with Layher when erecting industrial scaffolding – for the third consecutive generation. Read his story here. [www.scaffoldingstories.com/industry02](http://www.scaffoldingstories.com/industry02)

Layher. 

More Possibilities. The Scaffolding System.

The world authority  
in powered access

If you use one of these,

you need one of these.

IPAF Approved Training Centres train more than 150,000 operators every year in the safe and effective use of powered access platforms.

The IPAF PAL Card is recognised worldwide across industries as proof that your operators have been trained to the highest safety standards and meet all legal requirements.

Find an IPAF approved training centre at [www.ipaf.org](http://www.ipaf.org)

The IPAF operator training programme is certified by TÜV as conforming to ISO 18878.
